In: <i>Proceedings of the 10th International Conference on Sago Palm Studies (ICSPS)</i> . The Food and Agriculture Organization of the United Nations (FAO) and four members of Society of Sago Palm Studies (SSPS), 10-12 April 2024, Port Moresby, Papua New Guinea.
Abstract / Content summary	The Food and Agriculture Organization of the United Nations (FAO) and four members of Society of Sago Palm Studies (SSPS) will present the results of the research on the possibility of up-scaling sago production in the Sepik area, Papua New Guinea. The research aims to identify opportunities and challenges for increasing sago production in the region, taking into account local conditions and market demand. The presentation will include a summary of the research findings, recommendations for future research, and conclusions.
