

Parent project	
Project type	Study
Status sort	Current year started
NARI code	T20332
Donor code	
Funds source	Funded from R4D funds
Budget	K20, 000
Project name	Assessing the baseline productivity of native chickens from different ecotypes adapted to highlands conditions.
Name abbrev	Productivity of native chickens
Detail	
NARI team lead	Jeremiah Ahizo
Project team	
Partners	
Start date	2023/07/15
End Date	2025/07/15
Intended outcomes	
Planned outputs	<ul style="list-style-type: none"> • Information on the status and diversity of local chicken ecotypes available for the highlands region. • Baseline information on growth and production potential of identified village chicken ecotypes established for highlands conditions. • Breeding stocks of improved village chicken ecotypes and/or their crossbreds available on-station for additional research or distribution. • Phenotypic information and descriptor list as well as guidelines for phenotypic characterization of village chicken ecotypes adapted to PNG conditions available.
